PROJECTS

Budget Tool 2.0

- Web app created to facilitate the management of a personal budget.
- Features include income and expense tracking, monthly income calculator, budget category creation, monthly and historical data visualizations, and insights.
- Built using React, Node.js with Express, MySQL and deployed on AWS.

Live project: budgettool.matthewvogee.com/landingPage

Github: github.com/mvogee/budget_tool_2.0

Electrical Material Scraper

- Created to help with jazbo.io bidding functionality. Finds and updates materials within the site without needing to manually update products and prices in the database. Includes a front-end search to view and search the database without going through jazbo.io.
- Built using Node.js with Express, React, MongoDB, and deployed on AWS.

Github: github.com/mvogee/material_price_scraper | github.com/mvogee/Price_scraper_frontEnd

TECHNICAL SKILLS

Javascript | Typescript | React | HTML | CSS | Bootstrap | Node.js | MySQL | MongoDB
